AVA™ Enterprise Manager Functional Components

AVA™ Manager Suite

Background:

AdvanTech, Inc. is proud to unveil our **AVA™ Manager Suite**. These applications are all based on three guiding principles of:

Accuracy, **V**isibility and **A**ccountability.

These applications are browser-based, online, real-time using standard browsers and rely on a central encrypted relational database located in Annapolis or at your site.

Our systems are in operation throughout the U.S in multiple industries. Our goal is to assist our clients achieve substantial savings through implementation of advanced technology and best operational practices.

AVA™ Asset Manager:

Defines facilities to the room level. Tracks assets (moveable and fixed) to the serial number level to individual rooms. Assigned ownership of each room within each facility. Establishes and tracks projects and work orders to document and monitor labor and non-labor costs. Automates the internal package delivery process by defining delivery routes and building manifests to deliver within the organization. Track employees, contractors and visitors who have access to assets. Performs physical inventory counting and reconciliation processes. Generates numerous operational and accounting reports.

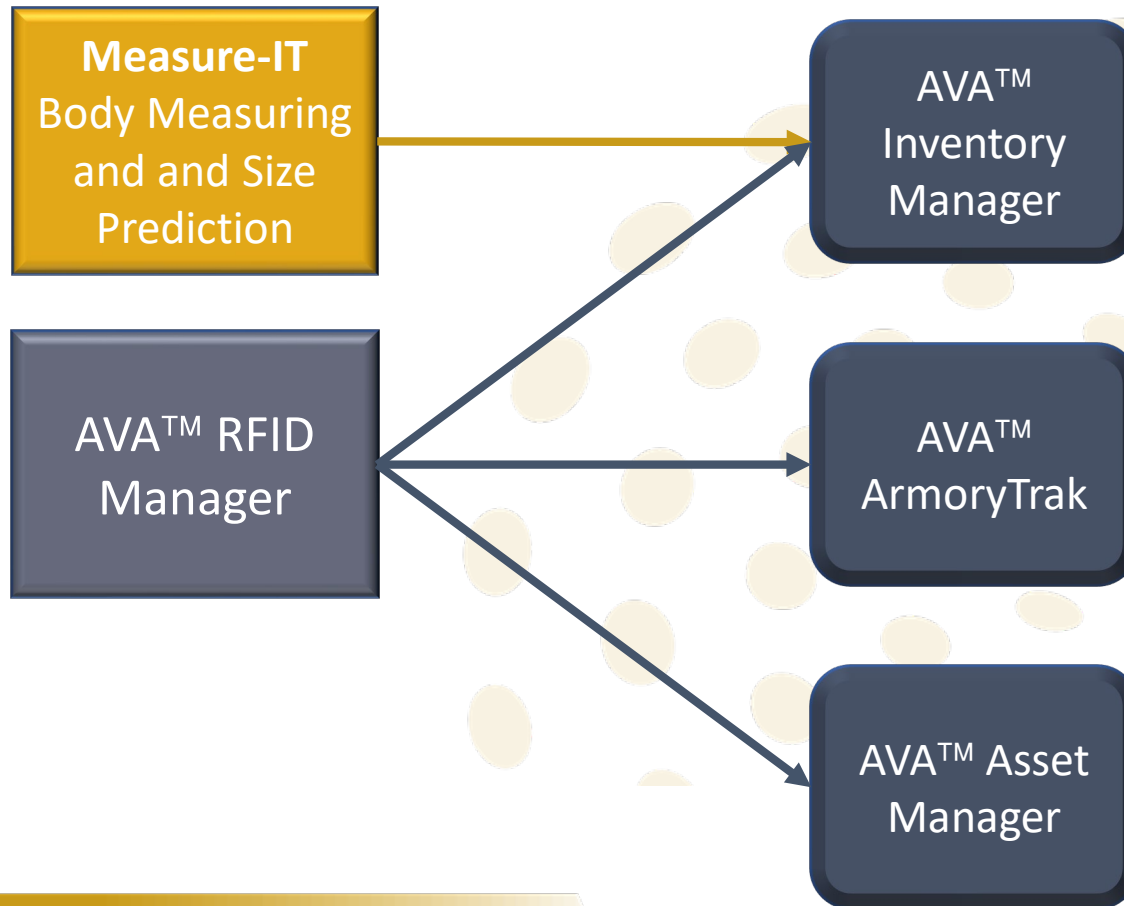

AVA™ Item Manager:

Fully-featured, multi-entity, procurement, requisitioning, receiving, remote inventory, cross leveling and perpetual inventory management system. Full audit trails with transaction history. Multiple stockrooms allowed with individual reorder parameters established. Asset visibility option to include inventory levels from prime suppliers. Serial and lot number tracking available.

AVA™ RFID Tag Manager:

Upgrades Asset and Item Manager Applications to utilize RFID tags. Various RFID tag standards are supported including EPC Gen2 and Low-Energy Bluetooth. Tags are used for access control, in supply chain management to track inventory movement, to track files, laundry, garments, equipment assets such as wheelchairs, and high-cost or high-loss items such as electronics or tools.

AVA™ Asset Manager – Questions???

Facilities:

- What Facilities are included in my Organization?
- Who occupies my Facilities?
- What are the areas in Facilities used for?
- Blueprints and other document stored online linked to facility, floor and room.
- Fire Escape documentation.

Assets / Equipment:

- What assets are in my Organization?
- Where are these assets within my Facilities?
- Who owns these assets?
- What assets are out of service and for how long?
- What assets have just arrived into my Organization?
- What assets have excessive repair and maintenance costs?
- When were the assets last counted and reconciled?
- Which assets are owned versus leased or on consignment?
- How do I dispose of obsolete and unusable assets?
- What are my current depreciation amounts?
- Replace vs Repair decisions

Projects / Work Orders:

- What Projects and Work Orders are still open?
- What Projects and Work Order are being planned and/or approved?
- What are the budgets for these Project and Work Orders?
- Who is performing the work?
- Where is the work being performed (on/off site)?

People:

- Roles of Staff within organization.
- Visitor and Contractors allowed into the Facilities.
- Certifications of Staff using or repairing Facilities or Assets.
- How can I limit access to specific areas by Staff and Visitors?

System Architecture and Network Design

Software Functionality

Standard Functions:

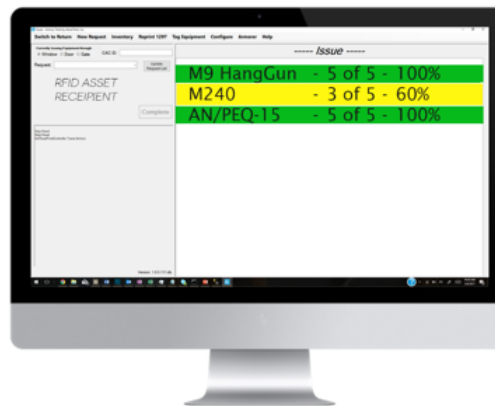

- Single Master Catalog
- Unlimited Individual Stockrooms
- Visibility Of Prime Vendor On Hand Balances
- Cross Leveling
- Replenishment Of Remote Department-based Stockrooms
- Automated Replenishment Level Calculations
- Automated Replenishment Orders
- Real Time Inventory Updates
- On Demand Inventory Status And Expediting Reports
- Multiple Inventory Valuation Formulas
- Receiving And Put Away
- General Ledger Interface For Posting Financial Transactions
- Comprehensive Physical Inventory, Cycle Count And Reconciliation
- Detailed, Read Only Transaction History
- Barcode Enabled
- Remote Departmental Requisitioning
- Performance Management Reporting
- Incorporated Non-stocked / Special Order Items

Other Available Functions:

- RFID Integration
- Serial Number / Lot Number Tracking
- Asset Tracking And Real Time Location System (RTLS)
- Electronic Advanced Shipping Notice To Automate Receipt Verifications
- Package Tracking

What is ArmoryTrak?

ArmoryTrak is a hardware/software solution that allows Property Book Officers and Armorer's to issue assets using Radio Frequency Identification (RFID) tags and readers

What is ArmoryTrak?

How ArmoryTrak Works?

RFID Tags placed on your assets respond to the hardware at your point of issuance allowing ArmoryTrak to register tag reads and electronically document the departure from and returning to the Armory.

What is ArmoryTrak?

How ArmoryTrak Works?

Key Features

- Automate Issue/Receipt of RFID Items
- Keep Accurate Digital Inventory of assets
- Print Property Book Receipts
- Reduced Labor Tasks
- Real-Time Visibility

Interfaced Systems

Listed below are the Systems AdvanTech AVA Systems have interfaced with

RFID Overview – Technologies Available

Category

Specifications

Reading Range

GPS

- Transmitter
- Satellite Reader
- Satellite Receiver

Active RFID

- Reusable Transmitter with internal power source
- Multiple Fixed Readers
- Extension of LAN / WAN

Low Energy Bluetooth

- Reusable Transmitter with internal power source
- Smaller Form Factor than Active RFID
- Smartphone Compatible

Passive RFID

- Disposable Transmitter with external power source
- Fixed Reader with Multiple Antennas and/or Handheld Readers

RFID Overview – Technologies Available

Deploys rapidly

• Analyzes data

• Smart notifications

Automated Data Capture Performance Matrix

Technology	Cost	Reading Distance	Read Direction	Triangulation	Facility/ Structural Limitations	Automated Reading	Network Required
Barcodes	Less than \$0.03 per tag/label	Under 18 inches	Line of Sight	No	Yes	Conveyor Required	Ethernet / WiFi
Passive RFID	Between \$0.10 and \$8.00	Under 32 Feet	Conical	No	Yes	With Fixed Readers	Ethernet / WiFi
LEB	Between \$15.00 and \$50.00	Up to 300 feet	Spherical	Yes	No	With Fixed Readers	Mesh
Active	Over \$65.00	Up to 500 feet	Spherical	Yes	Exterior Locations Only	With Fixed Readers	Mesh

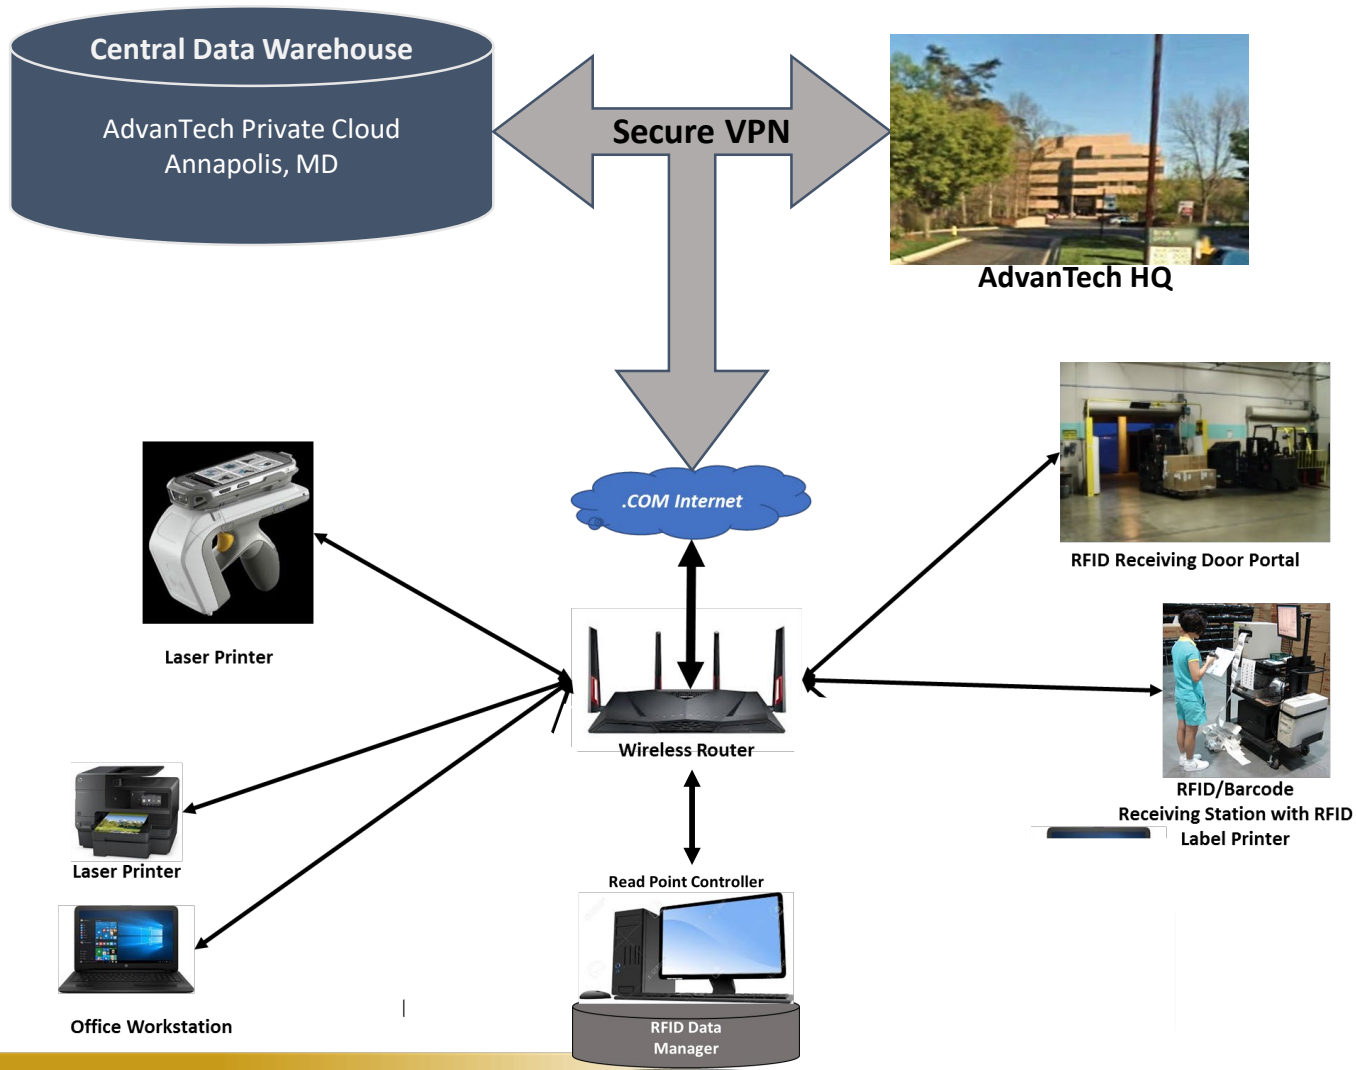

RFID Tag Location (pRFID vs LEB)

Hardware Cost Comparison (pRFID vs LEB)

	Tags for Pieces of Equipment (300)	RFID Printer / Encoder (1)	Fixed RFID Readers for 10 areas (20)	Handheld RFID Readers (2)
Passive RFID \$46,880	\$500	\$2,780	\$40,000	\$3,600
Low Energy Bluetooth \$17,000 (\$29,880)	\$5,000 Higher Tag Cost Larger Read Range	\$0.00 Printer not Required	\$12,000 Lower Reader Cost No visible Antennas	\$0.00 Smart Phone Application

RFID Overview – Shared Integration

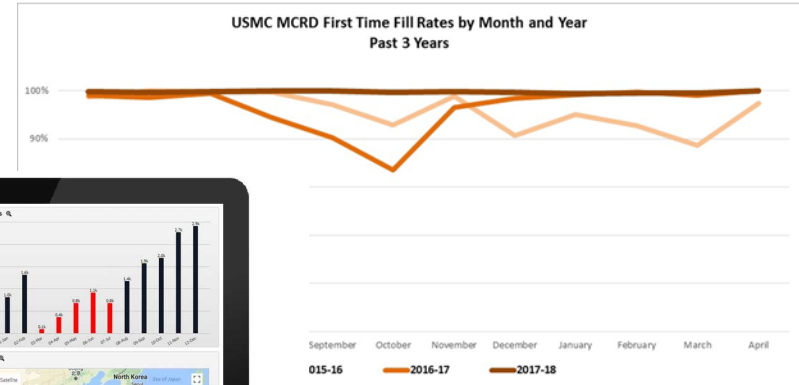

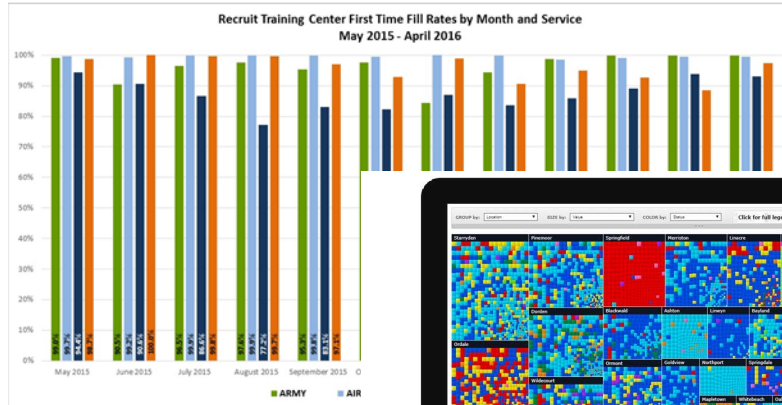

Documented Operational Improvements

Operational Activity	Documented Results
Production Control	Reduced Quality Checks by 20 hours per week
Receiving	Reduced Receiving Time to 20 Minutes from 3 hours
Point of Sale	Processed Platoon of 50 Recruits in 1 hour down from 2.5 hours
Physical Inventory Counting	Reduced Counting Time to 6 hours from 2 days
Physical Inventory Variance	Variances reduced to 0.18% from 5%-8%

Overview of Flaremap® JS

Data Visualization

“What you offer is far and away the best I have seen; and what I truly believe our clients have responded so strongly to is the innovation and thought leadership your team has.” - Director, Fraud Analytics

Dashboards / Business Intelligence

Flaremap® JS at-a-Glance

Flaremap JS integrates multiple data sources and embeds into existing processes—creating visual applications that help organizations monitor performance and manage risk.

- **Customers:** Production use by Fortune 500 and government customers
- **Deployments:** “Third Generation” Visual Applications
- **Product:** Flaremap® JS
 - Creates high-utility, data-dense workspaces
 - Highly customized to process context
 - Integrates with existing infrastructure
 - Optimized for use across multiple platforms
 - Flaremap Extensions Libraries for dashboards and operational deployments
- **Summary:** Single screen, instant access, simultaneous interrogation of data sources, integrating multiple investigation processes

Performance Management:
Visual Analytics in Action

Dashboards / Business Intelligence

Flaremap® JS – Select Customers

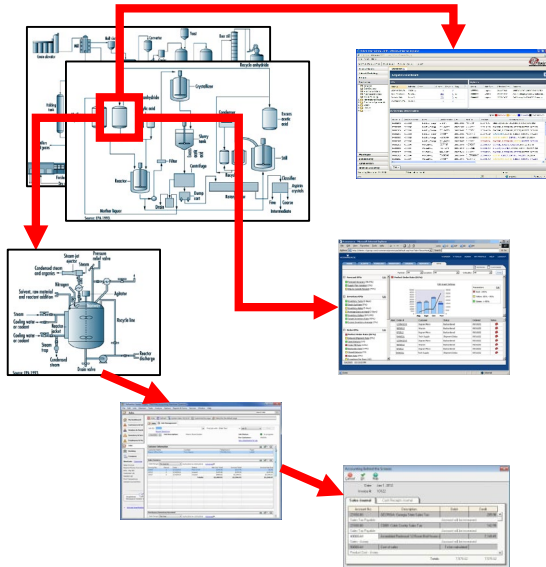

Dashboards / Business Intelligence

Unprecedented Visibility and Awareness

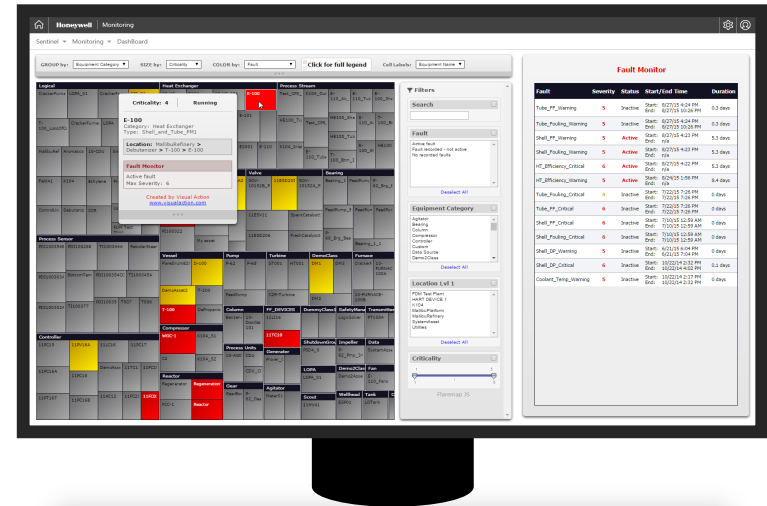

Before

- Many different systems required deep dives
- Complicated effort to get to the source of the problem

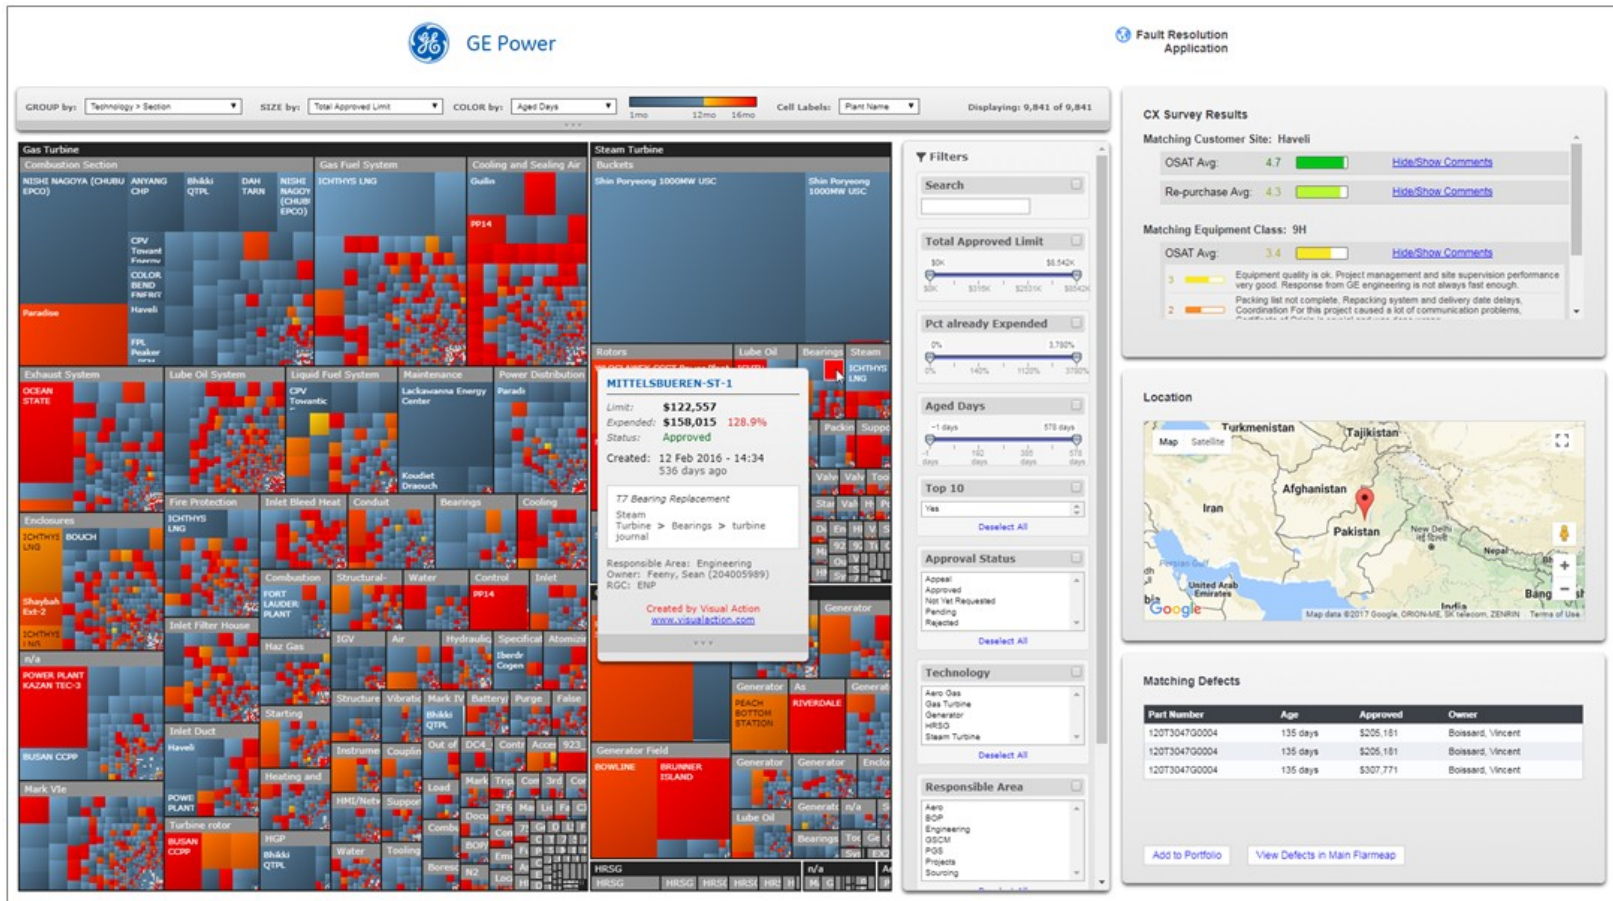

With Flaremap

- Anomalies are driven to the surface
- Hovering over an item instantly explains the situation

Dashboards / Business Intelligence

Example: Fault Resolution in Operations

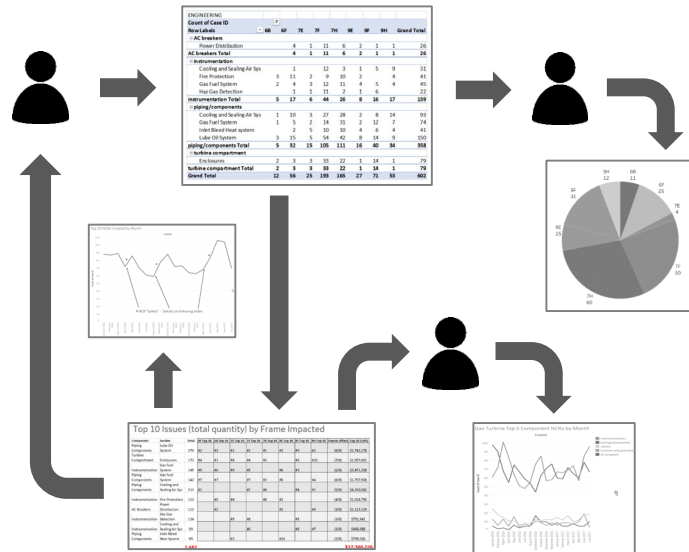

Dashboards / Business Intelligence

Holistic and Consistent Comprehension

Before

- Pages of reports, multiple analysis methods
- Poor visibility to problems
- Hard to understand, inflexible
- New queries manually intensive – could take days

With Flaremap

- All 8,000+ (\$130M) defects on one screen
- Dynamic, instantaneous analysis at your fingertips
- Always updated with the latest data
- Fully interactive – and can be viewed on any device

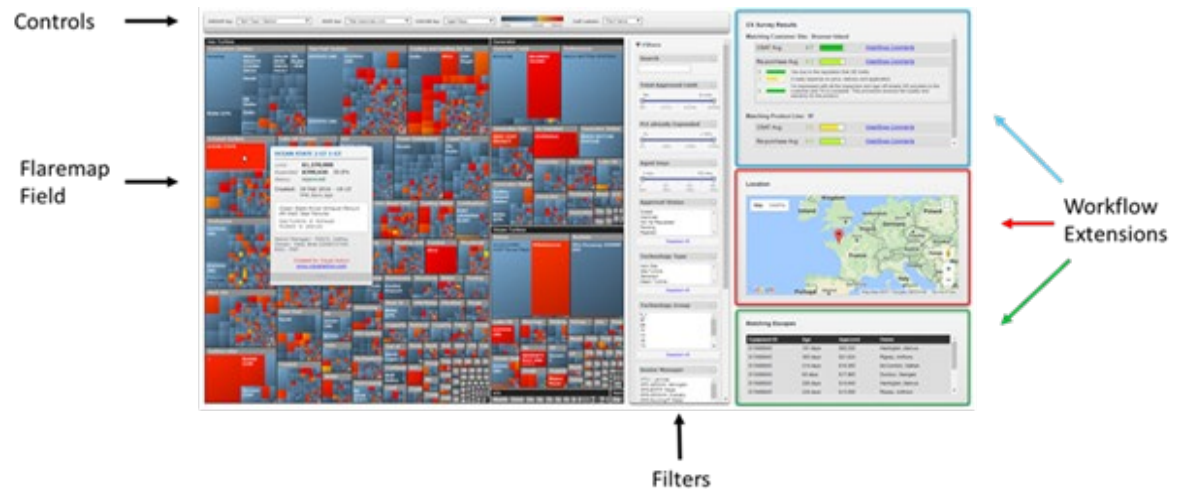

Dashboards / Business Intelligence

Flaremap Workflow Extensions

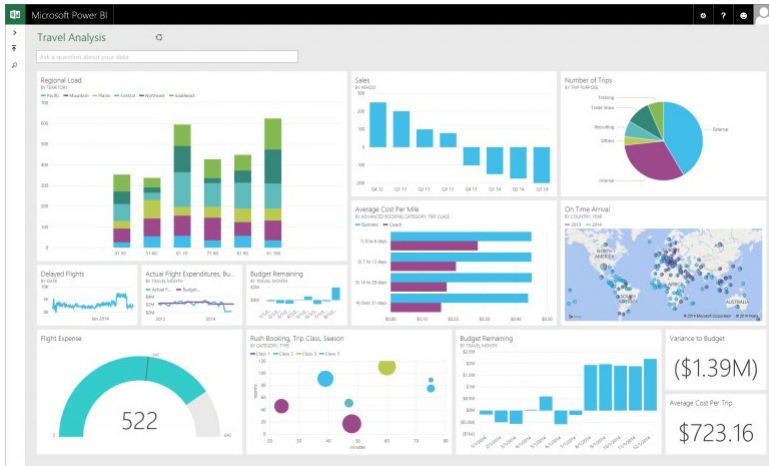

- Interactive extensions that facilitate day-to-day workflow.
- Deliver a synchronized, context-relevant and integrated interface.
- Custom-developed for speed, flexibility and compatibility.
